Loop Diagnostic – PATENTED FEATURE

Displays loop current, voltage, resistance, AC voltage and mode of operation simultaneously eliminating multiple DMM connections.

LOOP POWER ME	ASURE DIAG
CURRENT	= 20.00 mA
VOLTAGE	= 24.2 V
RESISTANCE	= 01210 Ω
GND FAULT ERROR	= 00.16 mA
AC V	= 0.0 V
HART® COMM DE	ETECTED

Make DYNAMIC loop readings under actual operating conditions

Included in the loop diagnostic features is its ability to measure ground current leakage from faulty wiring, flooded conduit, and corrosion bridges. This leakage subtracts from the signal current sensed by the receiving system (ie.: DCS), causing a measurement error.

EZ-Dial™ Knob

Change the speed of dialing your test point by just pushing down on the knob

Easily adjust output by 0.001 mA (0.01 %) or 0.100 mA (1.00 %)

EZ-Check™ Switch with EZ-Step™ Button

 $\ensuremath{\mathsf{3}}$ position tactile switch with push button for true one handed calibrations

Push button for stepping through calibration points

16 different step sizes

Hands-free auto step and auto ramp modes

Selectable soak and step time for working with valves

Uses a standard 9V Alkaline Battery

Superior battery life of 40 hours under typical continuous usage

Easy access to battery compartment

240 VAC Tolerant

Fuse-less protection from accidental misuse

Lightweight and rugged with a solid feel

Convenient Velcro \circledast hand strap allows for a firm confident grip or attachment to pipes and ladders.

HART® protocol compatibility mode

Power on selectable 250 Ω resistor in series with the output for compatibility with HART $^{\otimes}$ protocol enabled devices.

Description

Practical Instrument Electronics' Model 532 is the best tool for calibration, test, and diagnosing process loops. The Model 532 brings all the features you would expect from a loop calibrator and timesaving new ones. Make adjustments with the EZ-Dial[™] Knob or test limits with the dual action EZ-Check[™] Switch. Powerful ramping functions are only a button away on the Model 532. Save potentially hours of troubleshooting time on problem loops with the 532's unique Loop Diagnostic Mode. In Loop Diagnostic Mode, the loop current, voltage, resistance, AC voltage and mode of operation are all displayed simultaneously; without the need of multiple DMM connections. Loop diagnostic is available in every mode of operation and truly is a diagnostic monitor, as parameters are continuously updated in real time. The smart diagnostic tool even indicates the most likely cause of loop failure!
